TINTIC TO GET

Taylor & Brunton Company to Build Six Hundred-Ton Mill at Once.

WILL BE A CUSTOM PLANT can be consigned to our Tintic mill and receive precisely the same atten-

AND GOES UP CLOSE TO THE KNIGHT SMELTER.

One of the most significant items of news that has been released in mining circles for some time is the confirma-tion of the report by Manager T. R. bered, was figuring on doubling the Woodbridge that the Taylor & Brunton Sampling company is going to erect the slump in the price of the metals a 600-ton sampling mill at Tintic with- the court decisions against the smeltout a moment's unnecessary delay. The ers and the consequent closing down of plans are now all prepared and the several plants in the valley. The situaprobabilities are that construction will tion did not look good to the Taylor be under way by the first of the approaching July. Mr. Woodbridge stationary proaching July. Mr. Woodbridge stationary given up. Now it would seem that the ed yesterday that it was now simply given up. Now it would seem that the a matter of having orders executed for situation at Tintic had been thoroughly material and the assembling of a crew of mechanics to do the work. The deof mechanics to do the work. The de-cision to erect this mill was reached for business there; otherwise the or-found; while drifting in the contact just a few days ago, while Messrs. der to build the new mill would not Taylor & Brunton were both in the city. "The exact spot on which the plant

COPPER STOCKS IN BOSTON AND NEW YORK

Following is the daily market comment of Paine, Webber & Co., Boston, together al lead furnaces, making four in all, with the range of prices of copper stocks and other Boston listings in which the er lines than at first conceived west is interested, as well as a similar report on New York curb transactions, by James A. Pollock & Co., and from which it is secured for use in this department of The Herald:

er lines than at first conceived.

As a matter of fact, it now begins to look as though Tintic were destined to become one of the big smelting centers of the west, and that means, of course,

Boston, June 26.—Good buying of Osceola was the feature today. This stock was very scarce and advanced easily. A small speculative interest is springing up in the market for Wyandotte on th strength of the good showing at the lake but we don't think it will go far.

bridge, "has not yet been selected, but it will be in a very few days. You can say that it will be located at a point that will be accessible not only to the tracks of the Rio Grande Western and the San Pedro, but to the Jesse Knight camp railroad line, as well. This means, of course, that the mill will not be far from the Knight smelter, but let me

say at the same time that it is to be Representative of American wide-open custom plant, ready at all times to do business for everybody, just Fork Shareholders Brings as is done at our mills near Murray in this valley. Tintic ores, or ores from Excellent Report. the outside, for that matter, calculated

MINING TWO RICH VEINS valley plant. Tintic ores destined for

DRIFT IN CONTACT IN SURE TO CUT THE ORE.

the Tintic works a counterpart of our mills elsewhere and with the same (Special to The Herald.) American Fork, June 26 .- A. T. Gardner of this city returned home today from the Mountain Lake mine, near Heber City, where he had gone in the size of its mills at Murray; then came interest of a number of American Fork shareholders, who had become somewhat alarmed over recent reports regarding this property.

showed him every nook and corner of the workings. The face of the tuncanvassed and a knowledge gained that nel showed very plainly that the conthere is a lasting and profitable field tact had been cut and that no ore was have been promulgated. It looks as was being made with it. In commentfissure had begun, and nice progress ing upon this, the superintendent was isfied with the outlook for the future enthusiastic over the prospects of in mining at Tintic, and it looks, also, catching the ore by drifting, as it is very strong in the shaft workings above, and while the tunnel had tapped fore construction stops. Already the the contact at a point as near as engineers could determine would lead to a point at which it was supposed that the ore could be cut, it was quite evident that the tunnel could easily miss it either on one side or the other, while ook as though Tintic were destined to fore long. drifting would surely overtake it be-

At a point about 1,000 feet from the face of the tunnel Gardner was shown a small vein of rich ore which was being developed by up-raising. The vein at the time he was at the mine was six inches in width, and, according to the superintendent, it assayed on an average of 55 per cent copper, with high values in gold. This, he was sure, would lead to a large ore body as it seemed to be a very strong fis sure. Working on this were two shifts of two men each, and they were mak-

mines in the Good Springs district, Nevada, came up from the south yesterday morning. He has been down to the mine to look after the installation of the new to look after the new to look after the installation of the new to look after t to look after the installation of the new holsting machinery and compressor plant and was caught in conference with the superintendent of the Independent computer that concluded Mr. Jerson averaged between 15 and 25 per cent averaged between 15 a copper, with good values in gold. On In brushing up things for resumption this two shifts of four men were at

of operations at the smelter we have work.
found many things that required atten-All of the men seen at the property tion. We had hoped to get under way by the first of July, but that is now out of the question. We hope and expect, however, to be under way before the 16th. seemed to be very much pleased with the condition of the mine, although the contact had proved a disappointment, We are now receiving some ore, but some of our best contracts are being held back till closer to the starting time."

Concerning affairs down at the Ninety-Nine property. Mr. Jenson said that the mine was opened to a depth of 165 feet in the new working shaft. While mining is being carried on at this depth and above, one machine drill will be kept at work in the shaft, which is to be continued on down to the 500-foot mark without a stop, and probably deeper. A carload of fine ore was ready to send up to the smelter above Ogden when Mr. Jenson left camp and this will be followed by others at regular intervals.

and they were positive in the assertion that at no time in the history of the mine did the work seem to be in more every shot that was being fired in the drift on the contact, as it is expected that the ore will make at almost any moment.

A small force of men is now at work on the road leading to the mine up Snake creek, which is about two miles up the canyon. It is now in a condition to haul ore over, and no doubt some of the ore which has already been

tion to haul ore over, and no doubt some of the ore which has already been taken out will be sent on to the Knight melter at an early date.

Mr. Gardner was full of enthusiasn about the appearance of the property, and gave it as his opinion that the ground was capable of making a big mine, not only from the outward appearance, but also from the inne workings.

WEST LIMITS OF ONTARIO DRAIN TUNNEL REACHED

The western limits of the Ontario drain tunnel level, which is close to Daly West lines, was reached Thursday night and found to be in good condition, after being submerged for more than three years. The avenue, the face of which is about 4,500 feet from No. 3 Ontario shaft, is so muddy, dirty and slimy that it will take a few days to get it in shape to operate through. After that Manager Ernest Bamberger states, the task of sending the drift through. After that Manager Ernest Bam-berger states, the task of sending the drift out under the Daly West shaft will be taken up and vigorously pushed by the latter company. This means that it will not be long till the Daly West mine is drained and opened to an additional depth of 500 or 600 feet, making available the tremendous bodies of ore that it has been impossible to follow down below the 1,600 on account of the water. It simply means on account of the water. It simply means the making of a brand new mine of the Daly West.

Daly West.

Manager Bamberger stated that no effort had yet been made to examine the ledge cut in the Daly while the Ontario and Daly companies were extending the main avenue west in the direction of the Daly West, but after the general cleaning up this will receive attention and work will most likely be ordered started on it.

ORE FROM GOLD CIRCLE.

First Shipment From New Camp Started Yesterday.

W. F. Snyder, J. A. Foley and other Sal W. F. Snyder, J. A. Foley and other Salt Lakers who are interested in Gold Circle, were rejoicing yesterday over a telegram received from camp by Mr. Snyder. The message announced that the first shipment of ore from the youngest of the Nevada camps had just been started for Salt Lake City. It was said that the pay dirt would average not less than \$100 per ton. The ore was not sorted at all, but was taken out in the course of development and forwarded to the railroad without being picked over. The Gold Crown gets the credit for being the first producer.

DOINGS OF UNLISTED STOCKS ON EXCHANGE

During the open board trading yesterday morning Bingham Standard Copper sold at 20c; East Crown Point at 4c; Silver King Coalition at \$3.87½ and \$2.85; Thompson at 24c, and Untah Treasure Hill at 17½c and 18c.

Bingham Central-Standard was quoted at 36@37½c; Demijohn at 12½@14c; Mineral Flat at 16@19c; Old American at 20@21c, and Ohio Copper at \$2.30@2.50, with 6c bid for East Tintic Consolidated. Mason Valley was offered at \$1.40 and Naildriver at the a share

Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$46,000, as follows: Silver, lead, gold and ocpper ores, \$15,000; base bullion, \$25,000.

Metal Market.

Silver, 5414 cents per ounce. Lead, \$4.50 per 100 pounds.

TINTIC ORE SHIPMENTS FOR THE WEEK PAST

Eureka, June 26.—The shipments of ore from the Tintic mines for the week ending Thursday night were as follows:

Centennial-Eureka Eureka Hill ... Carisa Mammoth Grand Central

broken down for several months. There will be no more shipped from this mine until the new Knight smelter is ready to take the ore. The three cars from the Mammoth, which was leasers' ore, was sent to the United States smelter, and is expected that in a few days the con pany will receive word that shipping car be resumed on a large scale.

MINING STOCK EXCHANGE.

Prices Steadied Up a Little During the Single Session.

As a mark of respect to the late president the stock exchange ceased business for the day at the close of the morning regular and open board sessions. Business was slow, but there was a noticeable steadying of prices in most of the stocks dealt in and the prospects for a livelier dealt in and the prospects for a livelier session should be enhanced through the

adjournment yesterday.
"I think this market is again dragging around the bottom," said a member of the exchange at the close of the session, "and to me it seems that now is the time to begin taking on the better class of stocks again. The best part of the year is now ahead of us. The smelters will soon be running full tilt and the mines will be shipping at a lively rate. These things must have their effect and prices must

During the single regular and open board calls a total of 35,914 shares of stock, with a selling value of \$21,823,50, changed hands. Following is the list of final quotations and record of sales made: gone into the southern country to study mining conditions. They are said to be in Beaver county now, while later they will take a turn at the Pioche region,

Hot? Well I Should S

"Old Reliable" is getting quite busy these days. He makes a fellow's suit feel as if it weighed a ton or more.

How about one of our twopiece Coolers at \$10.00, \$12.00, \$15.00 or \$20.00? Serges, cheviots and worsteds, ABOUT AS THIN AS AIR.

Then a soft shirt—one of the new ones, at \$1.50 or \$2.00.

Some thin 50c underwear or 75c or \$1.00 and up. Just as you prefer.

Some thin hose for your lowcut shoes, and you'll be quite comfortable.

Oh, we forgot the straw hat to top off the outfit.

Splendid ones \$1.00 to \$4.50. Panamas, \$4.50 to \$12.00. Feel cooler already!
